DIGITAL SIGNING, DONE SIMPLY

WHAT IS FUSESIGN?

FuseSign is a digital signing platform that puts you in the driver's seat. It allows users to have greater control and flexibility, with highly customisable settings and features and an intuitive, easy to use design for an outstanding client experience.

FuseSign was created from our background as Chartered Accountants to answer specific needs from the professional services industry, removing existing roadblocks and frustrations that prevent your business to run at its best.

The results are significant savings in costs and human resources, professional and standardised systems for brand consistency and a happier team that can focus on the human side of their jobs.

FUSESIGN BENEFITS

1

COST AND TIME REDUCTION

Less paper, less printing and less spent on stamps. No more rushing to the post office and facing long queues.

2

BETTER CLIENT EXPERIENCE

FuseSign is available on mobile, tablet and desktop computers. Save your client from needing access to a printer or brave the post office to return their signed documents.

3

FASTER TURNAROUND

Have documents signed and returned within minutes, not days. Perfect for time-sensitive documents.

4

BETTER USE OF YOUR HUMAN CAPITAL

FuseSign frees up your admin and support staff to focus on the human side of their jobs.

DIGITAL SIGNING, DONE SIMPLY

ADDITIONAL RESOURCES

WHAT TYPE OF BUSINESSES CAN FUSESIGN HELP?

DO YOU OFFER INTEGRATIONS WITH OUR PLATFORMS?

We integrate with a variety of industry-leading software, with more to come soon.

To find out more, visit www.fusesign.com/integrations

TESTIMONIAL

// FuseSign is a serious game-changer for us in running our fast-paced accounting practice here in Adelaide. I am such a big advocate for leveraging technology to streamline our internal processes and believe having an aligned and tightly integrated technology stack is crucial to delivering the ultimate in efficiency, best practice, and ultimate client experience. It works seamlessly alongside our core products of XPM/FYI and the BGL Suite that it was a no-brainer for us to add FuseSign to the mix! We only wish it had come along sooner!
